Regional recruitment specialist, Active Resourcing, has achieved the 'Employer of Excellence' Accredited Standard, awarded by Peninsula Business Services, one of the UK's leading personnel and employment law firms. The award indicates quality and expertise in Human Resources and a high level of compliance with employment law, both particularly important areas for a recruitment company.

To obtain the 'Employer of Excellence' accreditation, Active Resourcing had to demonstrate it had a framework in place for applying best practices throughout its HR management processes: good news for both clients and candidates as it ensures that the highest standards of service are constantly provided.

Paul Preston, Active Resourcing's Managing Director said, "Achieving the accreditation is a fantastic result for our business. Everyone has played a real part in working towards it and they can be proud to be part of a company that clearly and publicly invests in getting better." Paul continued, "This award shows that we're committed to doing the best possible job for our clients and candidates."
